

Drastically reduce QA
cost and improve
developer productivity

QA Copilot with auto-
synchronization of TCs
with change
management

Auto-scale with AI agents

Auto generate domain
aware Test Data

Why Choose Us

Without Us

Evaluation of any tool takes weeks if not months and almost always requires coding effort

Test automation in 4-5 months

Changes require incremental engg effort

QA teams are 1/3rd of the team who require coding experience

Quality automation begins when page functionality is frozen or with production logs

CXO centric

With Us

Test drive with zero engg effort with just a URL

Test automation in 3-4 days

Iterate faster with changes

Reduce QA team by half and improve developer productivity

Shift Left by providing early insights to the developer, right from the first build

Developer obsessed

Join Our Growing Team Looking to Change the Future of TestOps
